

STAT2201, Semester 1 2016

Quiz #1a (15 minutes)

Name: _____

Student ID: _____

Lecture to which you are **enrolled** (circle one): Thursday / Friday

For these questions let M be your month of birth, i.e. $M \in \{1, 2, \dots, 12\}$.

$M =$ _____

Now use the value of M to obtain numerical/graphical answers to the questions below:

Question 1:

Let Z be a standard normal random variable (mean = 1 and variance = 1).

Use the normal distribution table on the back page (or a calculator) to evaluate:

$$\Pr(|Z| \leq \frac{M}{10}) = \underline{\hspace{4cm}}$$

Question 2: Assume a sample with 4 observations: $\{M, M^2, 3M, \frac{M}{2}\}$.

(a) Sample mean = _____

(b) Sample variance = _____

(c) Draw a rough sketch of the Empirical CDF for this sample:

NORMAL CUMULATIVE DISTRIBUTION FUNCTION: $\Pr(Z \leq x)$

x	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
